WHAT IS ARC?

* Configure controller into legacy mode or use legacy version controller

Efficient programming

Use the smart phone app for remote-free motor set-up along with a step-by-step programming wizard.

Conserves battery power

ARC motors use FSK modulation so they are less susceptible to RF interference from other common household devices and as a result battery power is conserved.

Bi-directional communication

Shade positioning and battery health is relayed via the smart phone app. A notification will prompt if the motor requires recharging.
